

# Make the US Web Design Standards More Awesome

Project Title	Make the US Web Design Standards More Awesome
Project Summary	Use your coding skills to improve a library of design guidelines that supports more than 100 sites across dozens of agencies. Earn the gratitude of public servants and get exposure to modern agile development practices.
Country	United States
Agency	General Services Administration
DoS Office	N/A
Post	N/A
Section	N/A
Number of Interns	1

## Project Description

The Web Design Standards are a library of design guidelines and code to help developers and designers quickly create trustworthy, accessible, and consistent digital government services. This open source project supports more than 100 sites across dozens of agencies, from NASA to the Navy.

We're seeking a code-inclined individual to support the U.S. Web Design Standards by maintaining and improving its supporting site generators, templates, integrations, and deployments. This is a great opportunity for someone who wants to get hands-on with design systems and gain deep experience with modern agile development in cross-functional teams.

Skills we're looking for

- HTML
- CSS
- Javascript
- GIT
- Jekyll experience a plus
